EXPERIENCE

2014 – 2015

AMAZON WEB SERVICES
SDE I · Cape Town, South Africa

Amazon Web Services is a subsidiary of Amazon that provides on-demand cloud computing services to individuals and companies. I was part of the launch control team our is responsible for creating and maintaining the API's that handles EC2 instances.

2015 – 2020

JUMO
SDE II · Cape Town, South Africa

JUMO is a FSP platform that enables a customer to access funds (microloans) via mobile at the lowest possible operating cost. During my time at Jumo, I was part of the savings, lending, and credit compliance teams.

2020 – PRESENT

GLOBEE
SDE III · Cape Town, South Africa

GloBee is a cryptocurrency payment processor, through various API's we enable customers to generate invoices and process payments. I formed part of a small team whose main focus was on designing and implementing new microservices that could replace the monolith. In addition to that, the team was also responsible for adding new products, currencies, and onboarding new clients into the existing echo system
